As the German mail steamer entered Woosung the other day, says the Shanghai Mercury, the steamer was boarded by Detective inspector Keeling and some yamen runners from the Mixed Court who arrested a young Chinese student who had been sent back from Germany on account of misbehaviour in that country. He was one of the band of youths sent to Germany and France last year by Chang Chih-tung to learn foundry and factory work, and is said to have been a particularly bright and clover and may be expected here on or about youth, earning at the time of his misconduct. about eighty marks a month. But he was London for this port, left Singapore frequently broke out in his intercourse with on Jan. 30, and may be expected his fellow-workmen in the foundry where he was learning his trade. He is, said to have been sent back to this country under arrest for having fired a revolver at a ponstable who tried to stop-him while fighting with a German workman. The question now is what kind of punishment will be awarded the youth for his misconduct in Germany? We should say, under existing circumstances, hardly any; most likely he will be sent in to Wuchang to be questioned by Chang Chili tung, and olever workmen with European experience being scarce, he will be re-employed at the foundry and from works at Hanyang; that is our opinion, but we may be wrong.

THE N.-C. Daily News says :- The Feima Channel promises to remain the best present channel Ithrough the Woosung Bar, and the best that there has been for many years. THE CITY OF PEKING OVERDUE Information of a disquieting nature was received in Hongkong this morning, with Peking, which should have arrived at San Francisco on 24th January. The steamer left this port on New Year's Day via Yokohama, and as she had not arrived when the telegram was despatched to the Hongkong and Shanghai Bank by its agent in San Francisco she is now eight days overdue. No intimation has yet been received by the local agent of the Pacific Mail Company, Mr J. S. Van Buren, but on enquiry we find that no apprehension is entertained over her safety. It is probable that her crank shaft has broken, or that she has met with some such accident which would account for her detention; and this belief obtains weight from the fact that on previous occasion the City of Peking was long overdue through the breaking of her shaft. If any such accident has occurred. it is hoped the same Company's steamer which left Hongkong ten days after the City of Peking, will fall latter vessel. Indeed, as these steamers have instructions not to go north of lat. 40°, it is considered most likely that the China, which is a faster vessel, will overtake her and stand by her or take her

On comparing the balance sheet for 1892 with that of 1891 you will notice a large increase in Accounts Payable on the one side and a corresponding increase in the aggregate our investments on the other. The increase in the former arises from advances employed in further Investments on Mortgages which yield a satisfactory margin of profit. Turning to the Interest Account a falling off of \$36,000 appears as against the collections in 1891, whilst our Rentals on the other hand show a satisactory growth of \$12,000. The decrease in interest is mainly due to the fact that ou completing the development of properties throughout the year we cease debiting

the same with interest, for so soon as they are productive the rentals go to swell the Rent Account as already mentioned. The apparent loss of interest of course at first exceeds the increase of rent, as property though complete cannot all he let in a day. and we may look for continued and permanent improvement in that source of revenue You may in these times naturally ask if we are satisfied that our mortgages are on safe basis, and I would say that during the past year the Directors have thought it award the prizes is not likely to grow in to flower gathering nothing, very much prudent to call up some of the mortgages popularity with boys.
